

Guidance for Contingency Planning Through Covid 19, including Remote Learning updated September 2021

Rationale

Schools have been directed to reduce operational Covid restrictions in order to promote a full curriculum and education offer to all children. Covid rates in the country are high and likely to remain so- as a school we need to be prepared for all eventualities whilst trying our very best to offer a full service.

Situation	Action to be taken	Children	Learning at home
A positive corona case is detected in a member of staff or a child following testing	Report to Public Health who will advise.	Both staff and children would be asked to take a Covid test, if negative children and those who have had both vaccines more than 14 days will NOT need to self-isolate.	Regular contact is kept with parents. Parents are able to contact the Home School Liaison Officer on 07564044248 Children not in school but well enough to learn will be provided with home learning activities appropriate to them.
One class or bubble is not adequately staffed	It is acceptable to move staff around bubbles, this will be done as carefully as possible, hygiene measures in place	Remain in school, all bubbles remain open with adequate but possibly different staff members	The usual service will run

Significant numbers of children are absent and most staff are in school	School remains open, this is unlikely as the requirement to self-isolate has changed	Those who are well come to school, maintaining bubbles.	Regular contact is kept with parents. Parents are able to contact the Home School Liaison Officer on 07564044248 Children not in school but well enough to learn will be provided with home learning activities appropriate to them.
Significant numbers of staff are absent and also significant numbers of children	SLT to review and re-organise groups to maintain staffing ratios. Bubbles are maintained as well as possible.	Those who are well come to school, maintaining bubbles where possible.	Regular contact is kept with parents. Children not in school but well enough to learn will be provided with home learning activities appropriate to them. This may be a reduced service if many staff are too sick to work.
5 or more cases, staff or children are identified within school over a period of 10 days	Report to Public Health who will review hygiene and ventilation systems in school	Any vulnerable children will be offered remote learning if families want it, children can be in school if families prefer	Dependant on Public Health advice
School leadership team is unable to attend school due to illness/ self-isolating, including DSLs	<ul style="list-style-type: none"> a. Teacher to be named as in charge on site. A rota to be in place so this responsibility is shared b. Telephone support to be offered by any well members of SLT c. Support to be given by CLPT to ensure that school can remain open 	Where ratios are safe children to remain in school. If there is an issue with staff: pupil ratios guidance above to be followed	Usual service to run where possible

Our Approach To Remote Learning

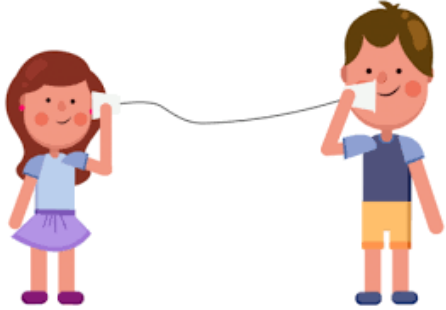

At Broadmeadow we recognise that learning at home might be a challenge for many of our families- school is a carefully planned and structured environment and children are used to learning in specific ways within school. Some children rely on the routine of the day and visual supports for learning and others benefit from being with other children to spark their imagination and communication skills.

We want everyone to have work that is accessible and suitable to them, we want parents to understand that we want to help them to get the best for their children if they are not attending school. Our class staff know the children extremely well and will strive to deliver a personalised home curriculum offer for each child. It will be based on the school curriculum with specific individual tasks included that link to the child's EHCP.

For many children their focus and attention is such that activities are short, parents should choose the best time in the day to present activities to children and let their child take the lead. Focussed work is often more productive following a burst of physical exercise like running or bouncing on a trampoline when the nervous system is calm.

Learning style	Resources provided	Amount provided	Feedback and monitoring
<p>Sensory learners</p> 	<p>Many of our children are learning through their senses and will require hands on exploratory resources. We will provide items, recipes (for resources such as play doh and slime) and ideas on how to engage children using such materials.</p>	<p>For children who are not attending school for any Covid related reason, eg self- isolation, rota, at least 2 activities per day will be provided</p>	<p>As a school we need to know how each child has responded to the activities and what to provide next time. Class teams and/or our home learning co-ordinator will speak with families at least once each week to understand this for those children absent for 5 days or more. If children are in school for some days this might be fortnightly.</p>
<p>Focussed learners</p>	<p>Some children at school are able to attempt paper- based activities like writing, cutting, number work etc. Some of this work will be linked to the current class topic, and some may be very specific to meet each child's individual outcomes derived from their Education, Health and Care plan.</p>	<p>For children who are not attending school for any Covid related reason, e.g. self- isolation, rota at least 2 activities per day will be provided, for those who enjoy this kind</p>	<p>Worksheets can be returned to school, it is helpful to know if a child had any help to complete and what kind of help – e.g. a verbal prompt to complete, or independently, or shown by an adult first</p>

		<p>of work they could have up to 5 tasks each day</p>	<p>For those not in school feedback will be part of the weekly contact as above</p>
<p>Practical learners</p> 	<p>Many of our children enjoy and excel at hands on activities, like making items, building models and creative tasks. Resources and activity ideas will be provided for these types of tasks, often linked to the school's curriculum maps for specific areas of learning. Some of this learning could happen outside and might be a physical task linked to PE.</p>	<p>For children who are not attending school for any Covid related reason, e.g. self- isolation, rota, activities such as this would be offered when they are being missed in school- so usually at least 2 times across a whole week</p>	<p>Photographic or video evidence can be shared with the class team and with our home learning co-ordinator using the Marvellous Me app. For those not in school feedback will be part of the weekly contact as above</p>
<p>On line activities</p> 	<p>Lots of our children like the internet and can use devices. For some it is difficult to complete an activity on line as they have specific activities that they go to every time they use a device- sometimes this distracts from learning. For others who are able there are some great learning apps that we can signpost families to. There are some national video lessons created by Oaks Academy that classes might ask pupils to look at if they feel they are appropriate. Some staff in classes have recorded routine activities (like story time or</p>	<p>Information can be shared with families at any time about suitable Apps- they can then monitor how often children are accessing them within the home. We would recommend no more than 60 minutes per day for this kind of activity and not for at least an hour before bedtime.</p>	<p>For those not in school feedback will be part of the weekly contact as above</p>

	phonics sessions) and links will be sent to families to join in with this		
<p>Maintaining routines and communication strategies</p> 	<p>Lots of our children enjoy the routine and structure of school. If appropriate families can use the same visual resources to structure their child's day when they are not in school. We have a wealth of experience in this field and can provide those resources that work for a child in school e.g. now and next boards, symbol or picture timetables, structured working.</p> <p>Many of our children are learning to communicate and whilst at home families can support this- it might need an in-depth conversation with a member of staff to begin. Once resources are in place and used consistently, repeating our approaches can be really effective in helping children manage their emotions when not in school.</p>	<p>This will depend on individual families, school will provide whatever is helpful to families and can use a range of media to help support it- i.e. discussion, instructions, in some cases video examples</p>	<p>For those not in school feedback will be part of the weekly contact as above</p>
<p>Monitoring by senior leaders</p>			
<p>Senior leaders liaise regularly with staff in school. They will support and direct colleagues to ensure that exciting and adequate home learning is in place when required for all children. Class teachers have support from their class team and also the home learning co-ordinator to ensure that a good range of resources can be prepared and communicated to parents.</p> <p>Weekly conversations with families are recorded on the school's system and these are accessed by the school's senior leadership team.</p>
